Subject: FW: Advanced notification of high visibility ORD products.
Attachments: Advanced notification memo.pdf; DAA Quarterly -OCSPP-072016 v4.docx

Hi David,

As per your request this morning, please see email that Bob shared with EC in April 2016 about advance notification. Bob, as the DAA for Science, would meet each quarter with the DAAs in the other program offices. The attached is a sample document that was used for discussion purposes during one of the quarterly meetings. You'll note that Advance Notification is listed.

Subject: Advanced notification of high visibility ORD products.

ECers

Attached please find instructions on the process to notify the IOAA of important and visible publications emanating from our research programs. The intent of this is to minimize surprises experienced by our partners in learning about the results of research that has impact on their programs and to make the process consistent across our Labs and Centers. The process is designed to impart minimal delays in our investigators submitting manuscripts for publication, while providing sufficient time to raise the awareness in potentially affected offices.

I want to emphasize that this is a notification process that requests review for policy considerations only, and does not evoke a technical review of our manuscripts by a program office. Of course, if suggestions are received that might enhance the communication of our science, than the investigators are free to consider them in revising the manuscript.

Please begin to use this process immediately. If you have any questions we can discuss at the next Monday Executive Council teleconference.

Bob
